Fred Sanfilippo, MD, PhD directs the Emory-Georgia
Healthcare Innovation Program, which has a mission to
advance innovation in healthcare research,
education, and service. For over 30 years he has been an
academic leader at Duke, Johns Hopkins, Ohio State and
Emory, serving as a division chief, department chair, program/center
dean, academic health center CEO, and health system board member.

During that time he led organizational and cultural
changes that significantly improved
academic clinical, clinical, and financial performance. He
was instrumental in the creation of the US Scientific Registry of Transplant Recipients
at Hopkins Medical Labs; a department of biomedical informatics
for
personalized and integrative health, and a new health platform
at OSU; as well as new centers for informatics, critical care medicine,
and integrative care, and aging at Emory.

Investigator-Initiated Seed Grants in Healthcare Innovation

emory-Georgia Tech Healthcare Innovation Program (HIP), in partnership with the Atlanta Clinical & Translational Science Institute (ACTSI), Georgia State University (GSU), and Children's Healthcare of Atlanta (Children's) is pleased to announce the fourth round of research grants in Healthcare Innovation. Seed grants will fund multi-investigator, multi-disciplinary teams examining healthcare services and their effectiveness. Awards will support innovative approaches that address issues of healthcare quality, costs, and/or access that are consistent with the goals of the HIP.

Types of seed grants will be offered: Preliminary Study Grants and Pilot Project Grants. For information regarding evaluation criteria, proposal formats, and submission instructions visit www.emory.edu.
